

## **Continuum Security raises 1,5M€ investment from Swanlaab, JME & Sonae IM**

- The company, with expertise in cybersecurity product development will strengthen its international expansion
- Continuum Security is the leader in Threat Modeling Automation, allowing their customers to identify security flaws in software during the design phase

**Madrid, November the 30th, 2017.-** [Continuum Security](#), a Spanish cybersecurity company in the Application Security sector and creator of an industry leading Threat Modeling platform has raised an investment round of 1,5M€ that will allow it to implement its international growth plans.

The round was led by [Swanlaab Venture Factory](#), a Spanish-Israeli VC fund with offices in Madrid and Tel Aviv. The round was joined by [JME Venture Capital](#) and the Portuguese group [Sonae IM](#).

Continuum Security, founded and managed by Stephen de Vries and Cristina Bentué has become a benchmark in the *Application Security Requirements and Threat Management* (ASRTM) sector, recently coined by Gartner in their Hype Cycle report.

In 2016 the company launched IriusRisk, a solution aimed at enterprises to help developers and security analysts reduce and mitigate software vulnerabilities at application design time. Thanks to this investment, Continuum Security will release IriusRisk 2.0 in 2018. In addition the company has also built the BDD-Security framework, an open source dynamic testing tool that helps businesses to integrate security testing in their development pipelines and is already a staple in SecDevOps deployments.

Continuum Security has a team of 10 with a European and American customer base, primarily in the financial and technology verticals. This financing round will consolidate their international presence and will further develop their sales and R&D teams.

PRESS RELEASE

According to Juan Revuelta, Director of Investment at [Swanlaab Venture Factory](#), *"Continuum Security is a perfect fit for our portfolio. The company is present in the segment with the most potential and impressive growth rates within the Application Security space. Continuum is also led and managed by a first-class team and has a product in the market that is superior to the competition. Put all of this together and we have all the necessary ingredients to achieve a successful investment"*.

Stephen de Vries, CEO and co-founder of Continuum Security highlights, *"This round allows us to continue investing in R&D and develop new solutions for the market so that our customers can spend less time on manual security reviews by using our automated solution; allowing them to build software faster and more securely right from the start"*.
